

Customer Testimony

I couldn't have asked for a better IT support team! Your qualified IT techs and engineers are always there to help us and every day they go above and beyond the call of duty for us to help make sure that our practice runs smoothly. Being a growing and fast-paced medical practice requires a lot of IT support, and I feel that we definitely get that from the AMSYS team. Thank you!

Kelly McSperitt, BSTM, RPT,

MANAGED IT SERVICES

Why Managed IT Services *will* save you money

Whether you are a small to medium size business or a fortune 500 company, your IT department cannot afford downtime, data loss or other problems that may result in unnecessary expenses.

AMSYS's mission is to help *YOU* reducing *YOUR* IT costs and increasing *YOUR* business success. We call this: "*applying intelligence*".

Our mix of over a decade of experience, combined with the best available technologies and proven processes have given us the ability to create **EMRGSM AMSYS Methodology**. It is a four-part framework covering aspects of creating efficiency, managing risk, reducing cost and growing revenue. This diagnostic tool is used to show your current IT state. This will give you an actual status about the strengths and weaknesses and where there is ***potential for improvement and cost reduction***.

With your decision to use Managed IT Services, it will impact your business positively for instance in the following areas:

- Clearly calculable IT costs
- Higher efficiency and performance
- Faster response to changes
- No external service and maintenance costs on internal server infrastructure
- Increased productivity for the end user
- Cost effectiveness due to lower total cost of ownership (TCO)
- Optimum of scalability
- Eliminating current SW-Assurance at the ASP SW-license model

AMSYS' price model is based on a flat fee subscription offering services 24x7x365. A service-level-agreement (SLA) describes performance and quality metrics that will govern the business relationship.

AMSYS serves companies mainly in the healthcare, finance, oil and gas, as well as retail industry. We are one of the leading national IT providers for Managed Services headquartered in Texas. Our team of certified professionals are some of the best in the industry. The services and solutions are professionally rendered and executed.
